About Me

Frontend developer student with a passion for CSS modern and creative web development. I enjoy creating pixel-perfect implementations of designs and writing clean, structured, and DRY code. The websites I develop are responsive, accessible, performant, and progressive enhanced. I continuously challenge myself to learn new skills and technologies, with my GitHub showcasing this growth through real projects.

Skills

Frontend

HTML, CSS, JavaScript · SvelteKit · Eleventy · Responsive & accessible web

Tools & Workflow

Git · GitHub · VS Code · Chrome DevTools · Scrum · Documentation

Soft Skills

Problem-solving · Creative · Communicative · Eager to learn

Projects

Current Project

- GitHub: <https://github.com/fdnd-agency/designingforrecognition/tree/dev>
- Live site: <https://designingforrecognition.netlify.app/>
- Developed in SvelteKit with component-based architecture
- For this project, I set up the project structure (files, folders & routes), created the shared stylesheet, and worked with remote functions.

Final Assignment after 1 year FDND

- GitHub: <https://github.com/vsheo/proof-of-concept>
- Live site: <https://proof-of-concept-rn2l.onrender.com/>
- Developed using Liquid, including API POST and GET routes
- This was the final assignment of my first school year, where I applied everything I had learned throughout the year

Eleventy Blog Generator

- GitHub: <https://github.com/vsheo/i-love-web>
 - Live site: <https://vsheo.github.io/i-love-web/>
 - Converted Markdown to static HTML
 - This is the first implementation of my blog site, and I am currently working on a new version using SvelteKit
-
